EDUCATION

- National Institute of Technology, Silchar Assam, India
B.Tech – Computer Science and Engineering | CGPA: 8.16 Aug 2023 – June 2027

EXPERIENCE

- S.N. Bose Summer Internship 2026 NIT Silchar
[Smart Campus Navigation System](#) | [Live Demo](#) Jun 2026 – Jul 2026
 - Developed a scalable full-stack Smart Campus Navigation System using React.js, Node.js, Express.js, and MongoDB, enabling efficient campus navigation through modular and production-ready backend services.
 - Designed and implemented RESTful APIs for route computation, landmark management, and location retrieval, following modular architecture and supporting seamless frontend-backend integration.
 - Implemented Dijkstra's shortest path algorithm with optimized graph representations to compute optimal campus routes, enabling efficient navigation across large-scale campus maps.

PROJECTS

- [TalentSync – AI-Powered Job Portal & ATS](#) Jan 2026 – Feb 2026
React.js, Node.js, Express.js, PostgreSQL, Redis, Kafka, JWT, Socket.io, Docker
 - Built a full-stack AI-powered job portal and applicant tracking system with a scalable microservices architecture spanning authentication, job management, applications, AI screening, and notifications.
 - Implemented secure JWT authentication with refresh tokens, Google OAuth, and RBAC, plus REST APIs supporting pagination, filtering, sorting, full-text search, resume uploads, and real-time tracking via Socket.io.
 - Integrated Redis caching, a Kafka-based event pipeline, Docker containerization, Swagger/OpenAPI docs, GitHub Actions CI/CD, centralized logging, and Jest/Supertest test coverage.
- [Multilingual AI Document Assistant](#) | [Live Demo](#) Apr 2026 – May 2026
Python, Streamlit, Google Gemini AI
 - Built an AI-powered document assistant using Python, Streamlit, and the Google Gemini API for PDF summarization, context-aware Q&A, multilingual translation, and text-to-speech generation.
 - Engineered PDF text-extraction and metadata pipelines with Pandas; integrated Gemini-based document intelligence and deployed the app on Streamlit Cloud.
- [CODEASTRA 2026 – Hackathon Management Platform](#) | [Live Demo](#) Oct 2025 – Nov 2025
React.js, JavaScript, Firebase, CSS
 - Built a full-stack hackathon management platform supporting team registration, secure authentication, online coding assessments, GitHub-based project submissions, and real-time competition management.
 - Integrated Firebase Authentication, Cloud Firestore, and Hosting with role-based admin features for secure user management and cloud deployment.

SKILLS

Programming Languages: C, C++, Java, Python, SQL, JavaScript | Backend: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, Socket.io, Microservices
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Framer Motion | Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Cloud Firestore
DevOps & Cloud: Docker, GitHub Actions (CI/CD), Firebase Authentication, Firebase Hosting, Git | Developer Tools: Swagger/OpenAPI, Postman, Supertest, Gemini API, OpenAI API
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

HONORS AND AWARDS

- Solved 500+ problems on LeetCode demonstrating strong DSA proficiency, with a contest rating of 1759.
- Contributed to open-source projects by fixing bugs and enhancing features through GitHub pull requests.

CERTIFICATIONS

- Mastering Data Structures and Algorithms using C and C++ – TakeUForward: Advanced data structures, graph algorithms, dynamic programming, and competitive programming techniques.
- The Complete Full-Stack Web Development Bootcamp – Udemy: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, REST APIs, PostgreSQL, and full-stack application development.
